Re: Ekahau SideKick 2 Wireless Site Survey — Quote No. 10754_TS_ESX_2026

Dear Throne Solutions Team,

Thank you for the opportunity to provide pricing for Ekahau SideKick 2 wireless site surveys across your six U.S. locations. Beersheba Wireless Design Solutions (BWDS), a division of Nad Network Services LLC, specializes in Ekahau-certified Wi-Fi site surveys, RF design, and wireless troubleshooting.

We have reviewed your Statement of Work for the Active Wi-Fi (Ekahau) Site Survey and are pleased to submit the enclosed quote. To give you flexibility, we have structured our pricing in two options:

- **Option A — ESX File Only:** the raw Ekahau .esx survey file for each site, with no written report.
- **Option B — Full Active Survey + Report:** a complete active survey with full site documentation and a consolidated written report, per your Statement of Work.

All surveys are performed on-site with the Ekahau SideKick 2 by an experienced, Ekahau-certified survey engineer (Ekahau Certified Survey Engineer – ECSE Design; Cisco Certified Specialist – Enterprise Wireless Design). We are ready to meet your scheduled dates and can coordinate combined travel across the Wisconsin sites to reduce overall cost.

We appreciate your consideration and look forward to supporting your project. Please contact me directly with any questions.

Sincerely,

Naod Tariku
Lead Wireless Network Engineer

Prepared for	Throne Solutions

SCOPE OF WORK

Professional Wi-Fi site survey at each location using Ekahau SideKick 2, performed on-site by an experienced wireless engineer. Two deliverable options are offered (see following pages). The active survey, when selected (Option B), documents the current wireless network, AP infrastructure, RF environment, physical site layout, and supporting network infrastructure per the client Statement of Work — including floor-plan verification, ceiling type/height, full AP inventory, two photos per AP plus height capture, site-environment and obstacle documentation, IDF/MDF/network-room location and cabling feasibility, high-density area mapping, coverage gray-spot analysis, rogue-AP detection, SSID inventory, wall-material survey, and client-device inventory. All surveys use active/AP-up methodology measuring RSSI, SNR, and 2.4 GHz / 5 GHz coverage.

Option B — Full Active Survey + Written Report

PER-SITE PRICING — OPTION B

#	Site	Scheduled Dates	Survey (Full + Report)	Travel & Expenses	Site Total
1	**Phoenix, AZ** 4313 East Cotton Center Blvd, Bldg 8, Allred Cotton Center, Phoenix, AZ 85040-8853	Pending	$3,500	$1,100	$4,600
2	**Aurora, OH** 1515 Danner Drive, Aurora, OH 44202-9273	Nov 2–3	$3,500	$740	$4,240
3	**Milwaukee, WI** 4855 West Electric Avenue, Milwaukee, WI 53219-1628	Pending	$3,500	$950	$4,450
4	**Pewaukee, WI** N16 W22419 Watertown Road, Pewaukee, WI 53186-1118	Nov 16–18	$3,500	$950	$4,450
5	**Florence, SC** 3001 West Radio Drive, Florence, SC 29501-7806	Pending	$3,500	$890	$4,390
6	**Madison, WI** 3030 Ohmeda Drive, Madison, WI 53718-6704	Nov 9–11	$3,500	$950	$4,450
	Subtotals — Survey Labor / Travel & Expenses		$21,000	$5,580	
ESTIMATED TOTAL — Option B (6 Sites)					**$26,580**

Survey labor flat $3,500 per site (full active survey plus consolidated Word report). All prices in USD; totals estimated pending floor plans and square footage.

OPTION B DELIVERABLES

- Annotated floor plan(s): AP locations, obstacles, high-density areas, coverage gray spots, rogue devices, wall/material types
- Photographic documentation: close-up and wide-angle AP photos, IDF/MDF/network-room photos, obstacle and rogue-device photos/video
- Consolidated AP inventory (model, indoor/outdoor, mounting type/height, operational status, location reference)
- IDF/MDF location log with photos, location details, and cabling-feasibility remarks (also reflected in the Ekahau file)
- Coverage gap (gray-spot) summary with ceiling height and AP-addition feasibility notes
- Rogue / unauthorized AP findings summary with supporting photographs
- SSID and client-device summary (primary/secondary SSIDs, device count and types)
- Completed Ekahau Site Survey project file (.esx) with all annotations, photos, and notes
- Final consolidated survey report formatted as a Word document with supporting photographs and floor plans

POTENTIAL TRAVEL SAVINGS

Milwaukee and Pewaukee are approximately 20 miles apart — scheduling them in a single trip saves roughly $950 in travel. Combining all three Wisconsin sites (Madison, Milwaukee, Pewaukee) into one trip could save approximately $1,500–$1,800 total.

ASSUMPTIONS & INCLUSIONS

- Ekahau SideKick 2 survey performed on-site by an experienced, Ekahau-certified wireless engineer.
- Option A delivers the raw .esx project file only (no report). Option B delivers the .esx file plus full site documentation and a consolidated written report in Word format, per the client Statement of Work.
- One on-site day per building assumed for a standard single building up to ~50,000 sq ft; for Option B, report production is included. Floor plans to be provided before each survey.
- Customer to provide site access, escort if required, and point-of-contact coordination for the survey window.
- All in-scope APs to be powered on (active) and reachable for the duration of the survey.
- Travel & expenses include airfare or mileage, rental car, lodging, and per diem as applicable to each location, billed per the per-site estimates above.

EXCLUSIONS & NOTES

- Pricing assumes up to ~50,000 sq ft per site. Larger or multi-floor sites add approximately $600 per additional 25,000 sq ft.
- This quote covers survey and documentation activities only; it does not include AP installation, configuration, or cabling remediation. Any remediation, replacement, or upgrade recommended as a result of survey findings will be scoped and quoted separately.
- Final pricing confirmed once floor plans and square footage are received.
- Prices in USD. Quote valid 30 days from October 30, 2026.
